Hi Charlie,

Currently 140 soil samples (SPLP ICP-AES 11+ Metals and Mercury) for this Case are scheduled with TAB. Would you like to see if CHM would accept those as well? These samples were not included in the calculation provided on Friday. These additional samples would result in CHM going from 18% to 25% over capacity. Thanks!

Usama,

Please ask CHM whether they are willing to be scheduled over their capacity by approximately 18% for the samples in this case.

All,

For scheduling on August 6, 2015, we have one project that requires direction for additional samples. Currently, there are 70 soil SPLP ICP-AES 11+ Metals and Mercury samples scheduled with TAB. Shipping has not started yet for this Case and the Region would prefer to have all samples scheduled with one laboratory, if possible. The Region has also indicated that shipping will occur on one day during the shipping period. Below are the Case details and a table summarizing the laboratories status, funding, and additional comments for this project. This table is also included as an attachment.
